

...DIY

- Fastens close to the edge without mushrooming, splitting or cracking.
- No need to double-joist when butting boards together.
- Installs with standard 16" on center joist spacing.
- Board sizes are 1" thick and 5 ½" wide in lengths of 12, 16 and 20'.
- Color-matched RimBoards (fascia) are 5/8" thick in 7 ¼, 9 ¼ and 11 ¼" widths and 12' long.
- Code listed and complies with ICC-ES, AC 174 and ATI CCRR-0124 ratings.

Is there a more attractive installation method?

WeatherReady Deck offers a traditional solid-edge board installed with color-matched screws.

But for the most beautiful, clean appearance, select our grooved board designed for stainless steel hidden fasteners. You'll also enjoy a faster and easier installation!

Are you an environmentally responsible company?

We at Gossen strive to be responsible citizens. We use energy-efficient manufacturing equipment, recycle our water used in cooling and reclaim 99% of our waste. WeatherReady Decking is 100% recyclable and will not leach harmful chemicals. We manufacture in the United States to strict industry standards and produce ARCAT green- compliant products for sustainable design.

weather[®] READY DECKING

When You Want the Deck of a Lifetime

As you plan your new deck, your excitement centers on entertaining friends and throwing family parties. However, you know there are downsides to deck ownership – that's why you're reading this brochure! At Gossen we agree - *You shouldn't have to waste your weekends working on your deck unless it's from a lounge chair.*

Take a few moments to learn why the lasting beauty of a WeatherReady® Deck is a great investment – a deck that looks great today and every day.

So what makes WeatherReady different?

We believe the answer is our cellular vinyl formulas. Our confidence comes from **over 40 years of cellular vinyl manufacturing experience** and 80 years in the building products industry. Our time-tested products can be found in thousands of homes nationwide. In fact, you may already own vinyl windows or interior/exterior decorative trim using Gossen's American-made cellular vinyl.

What is WeatherReady cellular vinyl?

Our proprietary cellular vinyl formula uses nanotechnology to fine-tune its components for increased performance, durability and strength. To ensure each board is of uniform quality, the WeatherReady process does not depend on fillers or inconsistent organic ingredients. As the first U.S. manufacturer of cellular vinyl, Gossen's talented R & D experts have dedicated themselves to producing the quality you deserve.

What Can I Expect from a WeatherReady Deck or Dock?

We know you'll be spending plenty to build the deck or dock of your dreams. Our commitment to manufacturing excellence ensures you'll have the place and time to enjoy your investment.

Beautiful Colors

Choose from Slate, Sand or Dark Goldenrod to coordinate with your home's exterior, or consider our new *Passport* line in Tuscan Cherry and London Grey. Built-in U.V. protection and durable pigments ensures its long-lasting color.

Low Maintenance

And we mean it - Just an occasional washing with mild soap and a quick rinse keeps it looking like new! WeatherReady Decks work hard so you don't have to.

Think Docks

Salt water or fresh – it doesn't matter. WeatherReady boards stand up to it all. No wood fibers or fillers to swell and rot.

Anti-aging

Your deck's worse enemy is Mother Nature. Our advanced anti-aging formulation eliminates unsightly and expensive deterioration – no warping, cupping, splitting or rotting.

Family-proof

Spills simply wipe up! You won't have to live forever with wine, food or grease stains.

Scratch Shield

A deck is for active living and most have the scratches to prove it! Not with the superior durability of WeatherReady Deck. Its scratch-resistant surface can handle your active family.

Bug Guard

Pesky termites and other wood-loving insects will have to dine elsewhere.

Mold Defense

WeatherReady cellular vinyl won't let unsightly mold or mildew take hold. Spores simply cannot penetrate its hard, clean surface.

Safety-first

The textured surface protects against slipping and never slivers. Boards stay cooler on hot summer days thanks to our proprietary *military-grade* pigments. WeatherReady Deck has the highest fire rating available - Class A for flame spread.

Our Promise

Your investment is protected by our comprehensive Lifetime Warranty. Always carefully compare a manufacturer's warranty and what it actually covers or excludes.

Can I build a WeatherReady Deck myself?

Whether you're a handy do-it-yourselfer or prefer to hire a pro, WeatherReady Decking is easier to work with than wood. Here's the technical information you will need to know.

- Installs with common woodworking tools and techniques.
- The same beautiful wood grain surface on both sides. 100% reversible – surface damaged boards can simply be flipped over. *
- Easier to work with – 30-40% lighter than most alternative deck materials.
- No predrilling required! Can be installed with common deck screws.
